Greetings,

"Responsible Large-Scale Mining: Global Perspectives," the first in series of Keystone Center independent science panels on the potential development of the Pebble Mine, was held on December 3, 2010 at the University of Alaska Anchorage. The event will be re-broadcast by 360 North on Alaska public television stations, GCI cable, and webstream on Saturday, December 11, 2010 beginning at Noon AKST and on Sunday, December 12, 2010 beginning at 8:00 a.m. AKST.

To view the event by webstream, visit www.360north.org and click on "Live Feed." To identify a local television station on which to watch the broadcast, visit <http://www.360north.org/wheretowatch.php>. You may also contact Jim Mahan of KTOO (jim@ktoo.org) with questions about how to watch the event.

"Responsible Large-Scale Mining: Global Perspectives" was a day-long event that brought together international experts from academic institutions, industry corporate social responsibility organizations, and non-governmental conservation, cultural, and sustainable development organizations. The panel included presentations and discussion of the criteria, standards, principles and practices by which mining proposals and mining operations can be evaluated by communities, government, industry, and non-governmental organizations. The event was free and open to the public.

For more information about this event and the KeystoneCenterdialogue on the potential development of the Pebble Mine, please visit www.keystone.org/pebble or contact me with any questions.

Sincerely,

TB

Todd Bryan, Ph.D.
